

15. Appendix C Adding Users to Oracle

15.1 Location of File:

15.2 Vehicle:

UNIX shell script

15.3 Procedure:

When you start the UNIX shell script, you will be prompted to enter the User ID and the User Password. Type in the User ID, and press Enter. Type in the User Password, and press Enter. You will be prompted to enter another User ID/Password. If you want to enter an additional user, type in the User ID, press Enter, type in the User Password and press Enter. Repeat this procedure until you have no more users to add. To end the procedure, press Enter without typing a User ID.

15.4 Commands Within the Script:

The following commands are used each time you enter a user:

```
create user &user_id identified by &password default tablespace users temporary tablespace temp;
```

```
grant connect, mtrcrol2 to &user id;
```

```
alter user &user_id default role all except mtrcrol2;
```
